

Oboflex® Comfort Foam

Relaxing Sleep thanks to Superior Resting Comfort

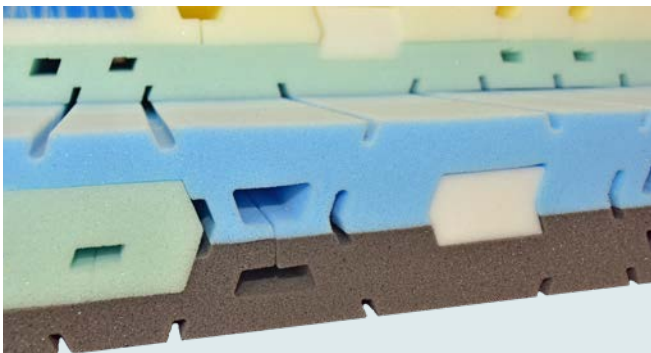

Excellent Sleep thanks to Highly Elastic HR Foam

Superior resting comfort and an optimal body support are key to a relaxing and restful sleep. The Oboflex comfort foam lives up to these expectations thanks to its excellent material properties, enabling optimal relaxation and regeneration.

As an HR foam, Oboflex provides unique comfort properties. HR stands for high resilience, and the name is fitting. The highly elastic comfort foam offers the perfect balance between pressure relief and support for a natural lying position and unique comfort.

Outstanding Point Elasticity

With its extremely high point elasticity, Oboflex precisely adapts to each body contour and thus ensures an optimal pressure distribution and relief. Thanks to its high elasticity, Oboflex reacts perfectly to every turn of the body and thus supports the natural change of position during the night.

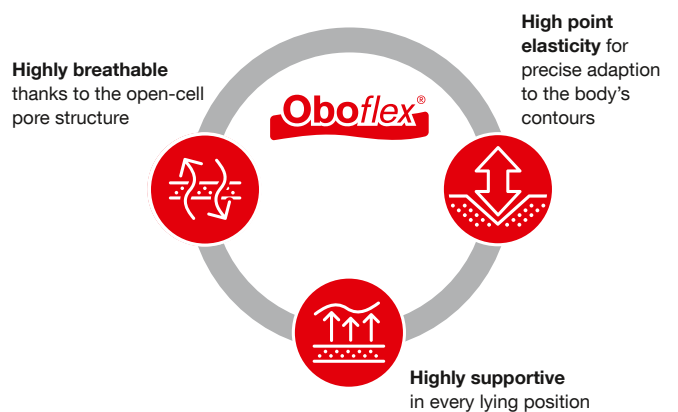

The body is supported and relieved anatomically correct in every lying position while the musculature relaxes. For a restful sleep during the whole night, to start the new day regenerated and full of strength.

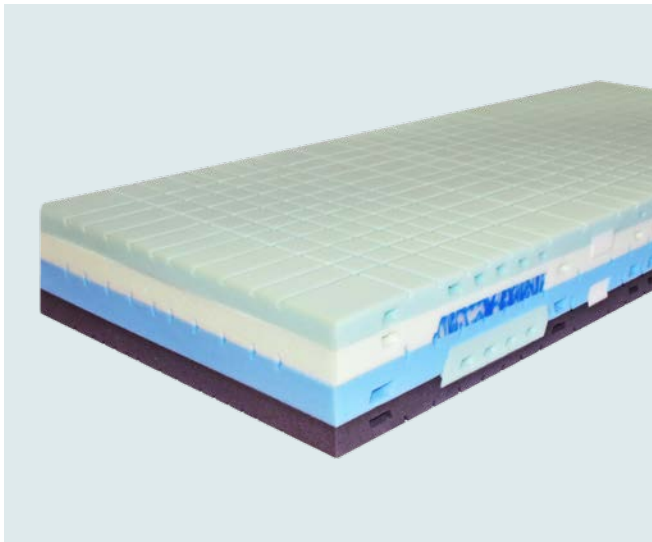

Outstanding Climate Control

The irregular, open-cell pore structure makes the comfort foam Oboflex especially air-permeable and breathable. This positively impacts the moisture regulation, which effectively prevents possible heat accumulation. With its climate-regulating properties, Oboflex promotes a dry and pleasant sleeping climate and allows for a good night's sleep.

Real Values

The comfort foam Oboflex is certified according to Landesgewerbeanstalt Bayern (LGA) for quality and against harmful substances, and is a comfort foam that provides real values. Its high elasticity, the very good pressure relief and distribution, and the excellent climate control promote a relaxing and refreshing sleep for an optimal start to the day.

Advantages

High point elasticity
for precise adaption to the body's
contours

Highly supportive
in every lying position

Highly elastic
for a quick reaction to every body
movement

Highly breathable
for a dry sleep climate

Areas of Application

- Comfort mattress cores
- Comfort pillow cores
- Comfort toppers
- Upholstery and furniture material

The FoamPartner Group at a Glance

FoamPartner is a global market leader in the area of polyurethane foam technology for industrial applications and for mattress and pillow manufacturers.

The FoamPartner Group develops, manufactures, processes, and markets high-quality polyurethane foams. Are you looking for individual foam solutions for exceptional sleeping or seating comfort? Or would you like to set yourself apart from the competition with a special design? With our comprehensive all-in-one service, we can help you turn your creative ideas into a reality – from the initial stages all the way to marketing story and logistic concepts.

Global Network – Always Nearby for Our Customers

With 14 sites in the business regions Europe, Asia-Pacific and Americas, the FoamPartner Group is at home all over the world and is also easy for international customers to reach.

Global Business Unit Living & Care – Modern Foam Solutions for Comfortable and Mobile Sleeping

The GBU Living & Care develops, designs, manufactures, and processes intelligent, innovative, and personalized system solutions for exceptional comfort and highest ergonomics. Our portfolio contains various high-quality premium comfort foams and tailor-made core constructions perfect for any product you have in mind. Different grades of hardness and densities can be combined for a wide variety of applications. We also offer special foams for caravans and mobile homes as well as for the health-care industry.

Our Services at a Glance:

Product Development and Design

- Material selection consulting
- Conceptual product design
- Tailor-made, intelligent core constructions
- Sample core prototypes
- Shop floor patterns

Sales Services and Marketing

- Isometric data in PDF format
- Visualizations and photo samples
- 3D rendering of mattress cores
- Functional samples
- Sample cores
- Product training
- Brand licensing

Logistics and Sales

- Logistics concepts
- Full-service solutions
